

Total E&P Libye will launch
A SEISMIC 3D PROCESSING (PSTM / PSDM)

Total E&P Libye is planning to perform a seismic data processing and reprocessing project, over part of Area 70/1 and 87/3 onshore Libya in the Sirte basin. The requested service is for a Pre Stack Time Migration of around 1200 sq Km of 3D comprising 700 sq Km of new data (to be acquired Q2/Q3 of 2013) and around 500 sq km of existing 3D data. The service may also include an optional PSDM processing of around 200 sq Km of existing data.

Total E&P Libye invites all companies which are specialized in PSTM and PSDM processing to submit their complete prequalification documents, for registration and pre-evaluation, in order to be considered for selection for the final evaluation.

The documents should include the following:

- * All necessary documents and licences attesting company registration according to the applicable laws and procedures in Libya.
- * Submission of experience records and CVs of key personnel specialized in similar works.
- * Submission of experience of performing similar services, as defined above, for onshore seismic processing inside and outside Libya during the five last years.
- * Submission of Financial Status documents of the company turnover for the last 5 years and the Organization Chart.
- * Full addresses of the company main office and its branches inside and outside of Libya; Total E&P Libye has the right to check-visit if it is found to be necessary.
- * Total E&P Libye has the right to request any supportive documents to the submitted data.
- * Last date for submission of offers is at 12:00 hours, Thursday on 5th Nov 2012.
- * Documents should be addressed and sent to the person authorised to receive and sign the covering letter at the following address:
